

NEXT GENERATION LIVING

There is SMART technology - and then there is P: LINK. Unlike other advanced SMART residential systems in the world, P:LINK is a proprietary system that connects you to not only the features and amenities of your address, but to "lifestyle" throughout the world. The first of its kind in South Florida, P : LINK is now going to be featured in all Paramount residences and is certain to revolutionize the way people live. Soon downtown buildings will be able to access beach clubs while Las Vegas residents can plan a visit to Miami.

P:LINK will give users access to the world - taking you places you have never been to do the things you have always wanted.

The future is a world without limits...a place where life and lifestyle become "one." The idea of watching a movie poolside is no longer a dream. And now, there is a place with a wireless system that is specifically designed to integrate your life...and it happens to fit in your hands. Welcome to your future. Welcome to the world of Paramount.
