YOUR BUSINESS

■ Hollywood-based **Simpli-kate Systems LLC**, a provider of building software, has entered into a marketing and licensing partnership with **AMX Corp.**, a manufacturer of building automation technology. By combining AMX hardware with Simplikate software, real estate developers and community associations can obtain a system that allows residents to communicate with building employees such as the valet and concierge and to monitor the front desk or gatehouse check-in areas. The system also will provide automation for lighting, drapes, HVAC and home theater in individual condos within a building.
